	 Closed US\$14 million loan facility with Sprott Resource Lending and repaid the Liberty Metals & Mining debt 						

Excelsior Mining Corp.

A mine-development company that is building the fullypermitted and fully-funded Gunnison Copper Mine in Cochise County, Arizona. The mine will use a low-cost, environmentally-friendly, in-situ-recovery copper extraction process to deliver a new source of American copper.

The neighboring Johnson Camp Mine was purchased in 2016 and will serve as the initial production facility; thereby dramatically reducing the overall capex.

CANADA JETLINES LTD.

Canadian air travel isn't cheap. In fact, it's way too expensive. While the rest of the world already has ultra-low-cost airlines, Canada is forced to choose between a few ultra-high-cost airlines. But we're going to change all that.

This is Canada Jetlines, serving the underserved with a new way to fly for a fraction of the competitions' price: the proven ultra-low-cost carrier (ULCC) way.

This model is nothing new to the rest of the world, and it's nothing new to the team. We are a publicly traded company, backed by a management team and board of directors with extensive experience in the low-cost airline industry. Now we're bringing that experience to the Canadian market with low-fare direct flights across the country, as well as to the United States, Mexico, and the Caribbean.

Lithion Energy Corp.

Lithion Energy owns a highly prospective lithium brine property in Railroad Valley Nevada, USA with 495 placer claims, totaling approximately 10,000 acres. The Railroad Valley Lithium Property is situated within east-central Nevada about 200 km east-northeast of Clayton Valley, which is host to Albemarle Corp's Silver Peak Lithium Mine.

A comprehensive review of the available data completed for the Technical Report indicates the Railroad Valley Basin may be a larger analogue of the Clayton Valley Basin, with strong potential to host lithium brine of favourable size and grade.

Cautionary Note Regarding Forward-Looking Statements

This document contains "forward-looking statements" concerning the business, operations and financial performance and condition of the individual companies. Forward-looking statements include, but are not limited to, statements with respect to the estimation of commodity prices, production estimates, mineral reserves and resources, the realization of mineral reserve estimates, capital expenditures, costs and timing of the development of new deposits, the success of exploration activities, permitting timelines, currency exchange rate fluctuations, requirements for additional capital, government regulation of mining or business activities, environmental risks, unanticipated reclamation expenses, title disputes or claims, limitations on insurance coverage and details regarding business plans and timetables. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as "plans," "expects" or "does not expect," "is expected," "budget," "estimates," "forecasts," "intends," "anticipates" or "does not anticipate," or "believes," or variations of such words and phrases or state that certain actions, events or results "may," "could," "would," "might" or "will be taken," "occur" or "be achieved" or the negative connotations thereof. All such forward-looking statements are based on the opinions and estimates of the relevant management as of the date such statements are made and are subject to important risk factors and uncertainties, many of which are beyond the companies' ability to control or predict.

Forward-looking statements are necessarily based on estimates and assumptions that are inherently subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the individual companies to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: risks and uncertainties relating to, among other things, changes in commodity prices, currency fluctuation, financing, unanticipated reserve and resource grades, infrastructure, results of exploration activities, cost overruns, availability of materials and equipment, timeliness of government approvals, taxation, political risk and related economic risk and unanticipated environmental impact on operations as well as other risks and uncertainties described under "Risk Factors" in the individual companies' continuous disclosure documents available under the individual company profiles at www.sedar.com, and/or the companies' websites. Although the companies have attempted to identify important factors that would cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated, or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. All of the forward-looking statements are provided for the purpose of providing information about management's current expectations and allowing investors and allowing investors and others to get a better understanding of the companies' operating environment. The companies expressly disclaim any intention or obligation to update or revise any forward-looking statements whether as a result of new information, events or otherwise, except in accordance with applicable securities laws.

Disclosure of Reserves and Resources

Information concerning the properties and operations of the companies have not been presented in accordance with Canadian standards under applicable Canadian securities laws, National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"). References to reserves and resources have been presented in an abbreviated format. Readers should view the individual company websites to see full disclosure of the reserve and resource estimates and appropriate Qualified Person and Quality Control information.
